Analyzing various types of servers using Webalizer Tool

Aim:

To analyze various types of servers using Webalizer tool.

Procedure:

Webalizer is a log-analysis tool, so the practical implementation consists of configuration and executing Webalizer rather than writing a conventional program.

Step 1: Install Webalizer

> sudo apt install webalizer

Step 2: Create Webalizer Configuration

Create or edit the configuration file:

>sudo nano /etc/webalizer/webalizer.conf

Step 3: Run Webalizer

> sudo webalizer -c/etc/webalizer/webalizer.conf

Step 4: View the Report

The generated report can be opened in a browser.

The link is : http://localhost/webalizer/

The report contains graphical and tabular info.

Result:

Analyzing various types of servers using Webalizer has been completed.
